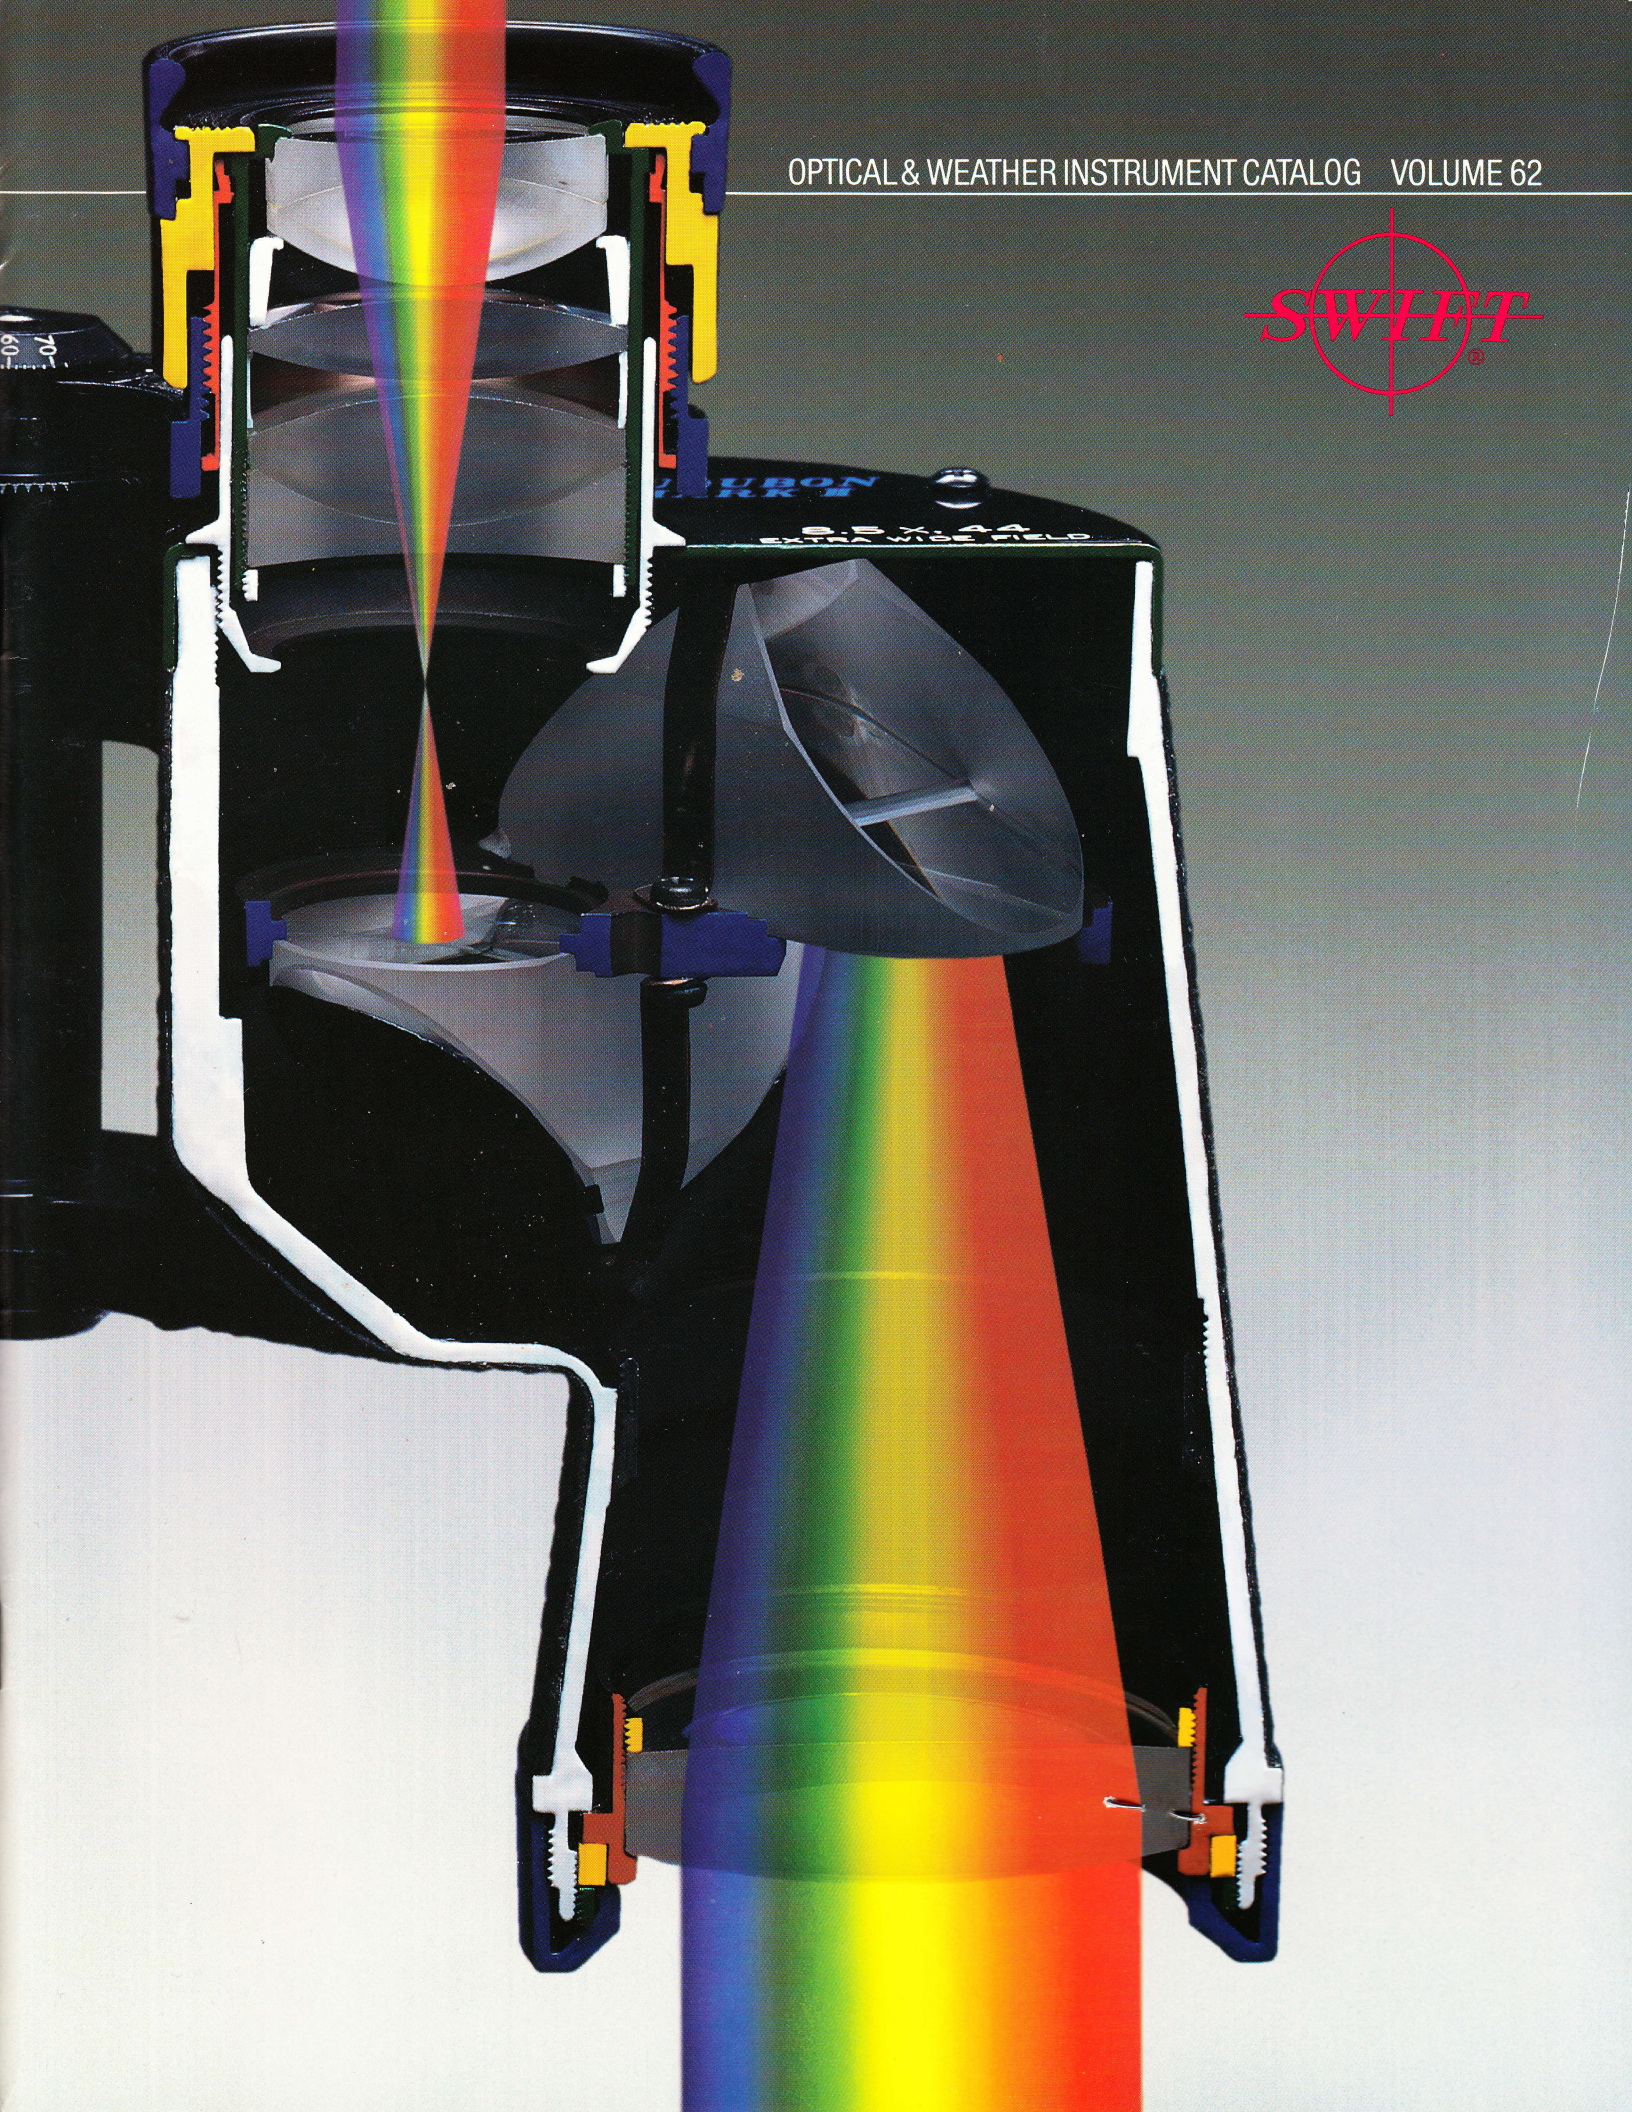
OPTICAL & WEATHER INSTRUMENT CATALOG VOLUME 62



A word about Swift . . .

Swift's drive for optical exellence started back in 1926 when Robert W. Swift, Sr. purchased a small binocular importing company – and the firm of Swift & Anderson, Inc. came into being. To the German Army Gray field glasses being imported at the time, Swift quickly added German prism binoculars, weather-indicating instruments, and specialty optics. Shortly thereafter, field glasses, opera glasses, prism binoculars, magnifiers, and weather instruments were also being imported from France.

After World War II, in its continuing drive for superior quality, the company began working with the Japanese optical industry in the development of a unique new Swift line. The successful results of this joint effort by Swift and Japanese technicians are embodied in the superior quality of the binoculars, spotting scopes, and other fine Swift instruments being used by discriminating people throughout the world today.

In the fifties, in order to better serve and service the entire United States, Swift established a branch office in San Jose, California. This branch also serves as headquarters for our Scientific Instrument Division, an entirely separate procurement and marketing organization for teaching, research, and industrial microscopes.

In 1959, Swift & Anderson, Inc. became Swift Instruments, Inc., registered the now famous Swift trademark, and incorporated Swift Instruments International, S.A. in Panama – at the same time opening a Tokyo branch office. S.I.I. does all purchasing and inspection and retains various specialists, including designers in Tokyo. From the beginning, our well-rounded staff has worked continuously to maintain Swift's leadership in the field of quality optics.

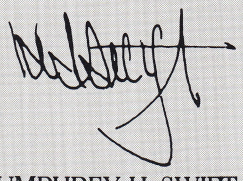
"TECHNICAL EXCELLENCE AND ENDURING QUALITY" – these words so personify Swift Instruments, Inc.'s goal that they have become synonymous with the name "Swift" and are almost part of our trademark.

In order to promote marketing on a worldwide basis, Associated Manufacturers' Agency in Tokyo was appointed exclusive Japanese export agent for Swift brand products to licensees in countries other than the United States. Swift licensees are well-established firms with complete warehouse, showroom, and service facilities, and are appointed the sole agents for their country. We are fortunate in having licensees in most major countries throughout the world, of whom we are extremely proud.

Swift Instruments AG was incorporated in Switzerland in 1972 to appoint and assist licensees in marketing in western Europe.

Swift executives constantly check on emerging optical industries capable of making quality products – and for this reason, probe the international scene for new products and seek out capable new factories in the commercial and scientific field. Just recently, some promising connections have been made with factories in Hong Kong, Mexico and Korea – so, the sun never sets on Swift endeavor.

Please peruse the exciting new products illustrated on the following pages – and be assured that all of us at Swift look forward to the continued pleasure of serving you.



HUMPHREY H. SWIFT
President

430

456M SUSSEX—(Mahogany)

Any executive would be proud to receive the magnificent Sussex. Every inch a classic in performance and appearance – it is stylishly decorated with a rich gold and black design on spun silver dials and thermometer scale, a decorative mirror, and brass bezels. This full-sized masterpiece (32″) contains a barometer, thermometer and hygrometer.

Model 456F (Fruitwood)

432M LANSDOWNE - (Mahogany)

Handsome hand-crafted case looks like a New England heirloom. Thermometer, barometer and hygrometer give the complete weather picture. Length—21″.

Model 432F (Fruitwood)

407 LEXINGTON

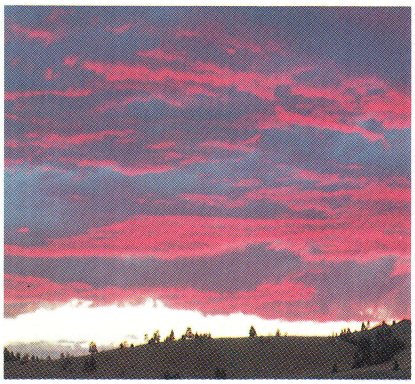
Reminiscent of a Tall Ship's wardroom, this weather station is a pleasing blend of gold (brass), rubbed mahogany, and bright silver,—striking in its simplicity. 16¼″ x 5¼″. Gift boxed.

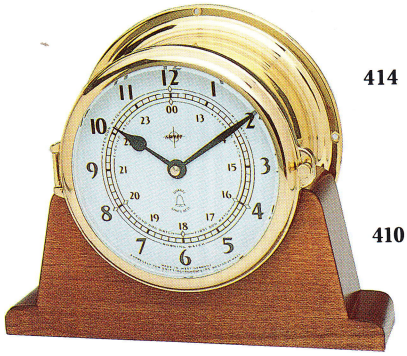
431 WATCHMASTER QUARTZ CLOCK

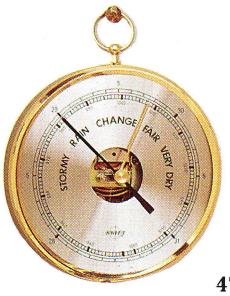
A high-quality German quartz movement is encased in a simple, highly polished and lacquered genuine brass case suitable for bulkhead mounting. A four-inch off-white dial with black Roman numerals and sweep second hand are featured on this attractive and functional clock. Case dimensions: 5″ x1⅜″. Wt: 5 oz. Gift boxed.

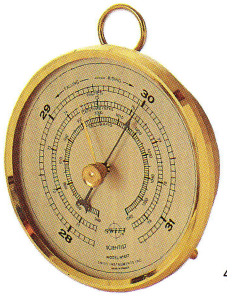
430 WATCHMATE BAROMETER/ THERMOMETER

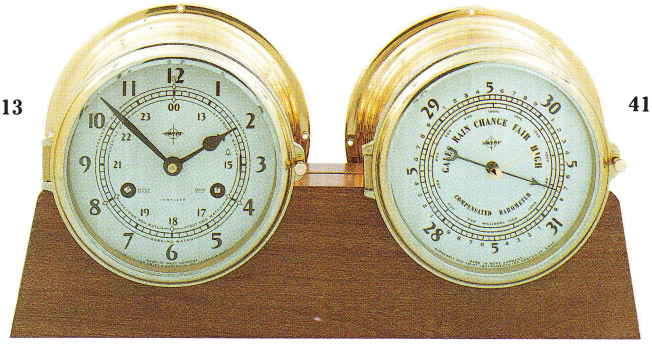
A companion to model 431 – the case is identical. On the open-face dial, exposing the highly polished barometer movement, is mounted a liquid thermometer calibrated in Fahrenheit and Centigrade – with scales 32 to 122 degrees Fahrenheit, or 0 to 50 degrees Centigrade. The temperature-compensated barometer is calibrated in inches of mercury and millibars. Wt: 6 oz. Gift boxed.











TALL SHIP SERIES

This seagoing series of instruments has solid brass cases with hinged, brass finished bezels—highly polished and protected with baked lacquer. The rear flange has four holes for bulkhead mounting and looks especially beautiful with any wood panel background. All dials are easy to read in their off-white background with simple Arabic numerals. Each comes with four brass screws and is individually boxed in styrofoam.

415 BARQUE TIDE CLOCK

Due to the high accuracy of the Quartz control used in this mechanism—this clock should be accurate within one minute per year. Together with the regular clock hands, or the minute and hour, and the red second hand, the Barque has an additional Tide hand which indicates the number of hours remaining to high or low tide. It is especially desirable for coastal areas.

414 PREBLE QUARTZ/SHIP'S BELL CLOCK

An outstanding addition to the Tall Ship Series is this accurate timepiece with a matching dial marked to show traditional watch periods used in the U.S. Navy—showing both Navy and civilian time. Melodious bells sound the proper number of times for each watch increment. Simply insert a 1.5 Volt Alkaline Manganese battery—and the clock and ship's bells will run for one year.

410 SINGLE BASE

This lovely hand-rubbed mahogany finished base has a recessed cradle and was designed to hold any one of the Tall Ship Series instruments.

413 CONSTITUTION CLOCK

A handsome ship's bell clock, with a precise 8-day jeweled strike movement, gives the proper number of bells for each watch increment from 1 to 8 bells every four hours. Inscribed on the dials are the names of the five watches—plus the dog watches.

412 CONSTELLATION BAROMETER

This compensated aneroid barometer of high quality has its dial marked in inches of mercury and millibars. The indicating hand—together with brass set hand, make it easy to guage changes in atmospheric pressure.

411 DOUBLE BASE

Two cradles are featured in this beautiful hand-rubbed mahogany finished base which was designed to hold two of the Tall Ship Series units.

474Q V.I.P. with QUARTZ CLOCK

Beautiful, decorative and functional – the V.I.P. has it all. This elegantly fashioned combination has three separate instruments – a barometer, thermometer, and a quartz clock – with spun silver dials and brass tone bezels mounted in a walnut finished block that rotates on a matching felt-padded base. A truly lovely addition to any home – or, the perfect gift for the person who rates No. 1 in your life. Carton boxed.

476 WEATHERMASTER

A precision scientific instrument mounted in a gilded case. The 5″ open silver dial is calibrated in 4 inches of mercury and in millibars. Compensated Holosteric movement. Adds a touch of beauty to your den or office. Gift boxed.

477 SCIENTIST

Holosteric barometer with dial calibrated in inches of mercury, centimeters and millibars. Gilded case, 5¼″ dial. For desk or wall. Gift boxed.

440 WEATHER STATION

Handsome walnut grained cabinet suitable for desk or wall mounting. Wind speed, wind direction and both indoor and outdoor temperatures are indicated electronically. The center dial is a high-quality Holosteric barometer. Electronic units are operated by a regular "D" type flashlight battery. Wind speed has two dials measuring from 0 to 25 miles per hour and from 25 to 100 miles per hour. Anemometer cable length—65′. Individual carton.
